

TradeVoice team profile (NAIC 2026)

How to fill this in: replace every [bracket]. Each member writes and checks their own entry. Delete the member sections you don't use (a team has 1 to 6 people). Keep it in plain English, in the third person, with no personal phone numbers and no ID numbers. Then export it to PDF for the NAIC form.

The team

- **Team name:** [team name]
- **Applying as:** [individuals, each with a valid government ID] or [a registered company: name and RC or BN number]
- **Location:** [city, state], Nigeria
- **Track:** Innovation & Enterprise
- **Problem statement:** PS2, Voice-First Access
- **Project:** TradeVoice, voice and chat bookkeeping for Nigerian market traders, built on N-ATLaS. Live at <https://tradevoice.duckdns.org>. Code at <https://github.com/Godzilla-lab/tradevoice>.

Members

Member 1: team lead and submitter

- **Full name:** [full name]
- **Role on TradeVoice:** [role]
- **Bio (2 to 3 lines):** [what you do, what you studied or work on, what you built in TradeVoice]
- **School or company:** [school or company]
- **LinkedIn or GitHub:** [link]

Member 2

- **Full name:** [full name]
- **Role on TradeVoice:** [role]
- **Bio (2 to 3 lines):** [bio]
- **School or company:** [school or company]
- **LinkedIn or GitHub:** [link]

Member 3

- **Full name:** [full name]
- **Role on TradeVoice:** [role]
- **Bio (2 to 3 lines):** [bio]
- **School or company:** [school or company]

- **LinkedIn or GitHub:** [link]

Member 4

- **Full name:** [full name]
- **Role on TradeVoice:** [role]
- **Bio (2 to 3 lines):** [bio]
- **School or company:** [school or company]
- **LinkedIn or GitHub:** [link]

Member 5

- **Full name:** [full name]
- **Role on TradeVoice:** [role]
- **Bio (2 to 3 lines):** [bio]
- **School or company:** [school or company]
- **LinkedIn or GitHub:** [link]

Member 6

- **Full name:** [full name]
- **Role on TradeVoice:** [role]
- **Bio (2 to 3 lines):** [bio]
- **School or company:** [school or company]
- **LinkedIn or GitHub:** [link]

Roles to choose from (these are the parts of the work in this repo; merge them if you are fewer people):

- Team lead and submitter
- AI engineer: N-ATLaS on Modal, the speech models, the benchmark
- Backend and web app: the server, accounts, the Telegram and WhatsApp bots
- Product design: the app screens and the website
- Testing and data: the test sentences, the test suites, the results log
- Pilot and languages: trader outreach, consent, the Yorùbá, Hausa and Igbo checks

How we work

Keep, change or delete each line so it is true for your team.

- **Who decides what:** [for example: the lead sets priorities each week; each owner decides inside their part]
- **How we meet:** [for example: a short call on [days], and a team chat for the rest]
- **Where the work lives:** one GitHub repository, with automated tests (`python eval/run_all.py`) and a browser test (`eval/browser_test.cjs`). [Say when you run them, for example before each

update to the live server.]

- **How we measure:** every benchmark run is logged in [docs/RESULTS.md](#) with its date and command, including the runs that went badly.
- **How we treat data:** made-up names in every test, demo and document. Traders give consent before the pilot. Keys stay in `.env` on the server, never in the repo or the chat.
- **How we work with traders:** [for example: who visits which market, in which language, and how feedback reaches the team]
- **AI tools we use:** [list them, for example the assistants used to write code and test sentences]

Contact

- **Team email:** [team email address] (the same address as the privacy contact on <https://tradevoice.duckdns.org/privacy>)
- **Website:** <https://tradevoice.duckdns.org>
- **Code:** <https://github.com/Godzilla-lab/tradevoice>

Never put a personal phone number in this document.
